

How to Access Real Time Mission Bay Shuttle Predictions

In the Moovit app:

Use the **Directions** tab to

- Enter your starting point and plan your trip, suggested routes will show up here.
- Choose specific routes or transit types
- Use this tab for access to your most-used and recent locations

Use the **Stations** tab to see a map of transit stops around you and a list of transit lines that stop there and their **next arrival times**. Tapping on this tab will show your current location and nearby stations.

Tap on the station to see next arrival times. You can also save this station as a “favorite” by tapping the star on the top right of the station’s card.

Use the **Lines** tab to look specifically for a specific line and see its route on a map as well as next arrivals.

In the Transit app:

- Tap the route in the **Nearby List**; then tap the clock icon
- Press and hold the button in the bottom right hand corner to compare **real time predictions** with scheduled arrivals.
- When you tap on the transit line bus route from the **Nearby screen**, you’ll see bus icons on the map showing their location

Customize the Transit app by adding the routes you use most often in Favorites and create “Saved Locations” for home, work, and other frequent destinations.

In the Google Maps app:

From Android phones:

- Open the Google Maps app
- Tap the Menu in the top left corner and select **Public Transit**. Your options, with next arrival times will show up.

From iPhone or iPad:

- Open the Google Maps app
- Tap “Layers” for the view you want (Transit) in the top right corner

From your computer:

- Open Google Maps
- Click the **Menu** in the top left corner and select **Transit**
